Subject: Regarding: DOC-255246A1.doc - Use of cell phones on AirplanesQ

Here is my 2 cents regarding the use of cell phones on airplanes:

04-435

- I am a frequent traveler and I do not see anyone using the seatback phones on the planes. I think the cost prohibits that.
- If the internet could be used on the airplane for long trips that would assist passengers as long it was reasonably priced.
- If we were allowed to use cell phones on the planes there would be a lot of loud mouth talkers annoying all the other passengers and possibly cause conflicts.
- I don't want to sit "rubbing elbows" with someone who is on the phone the whole flight!
- While the idea seems to be a nice feature for travelers but I think it would turn into a fiasco in flight.

Thanks,

Kevin Holzmeyer
